

Watertown City Council

June 14, 2022

Agenda Item: As-built Foundation Survey**Request for Action:** Direction on How to Proceed with As-built Foundation Survey**Employee/Dept.:** Jake Foster, City Administrator**Background:**

The City of Watertown adopted an ordinance to the City Code in 2007, requiring than an intermediate inspection of the foundation for any building once poured. This inspection is done via as-built survey. However, the City has not been performing these inspections/requiring these intermediate surveys to be done for approximately 10 years.

Staff is looking for Council direction as to whether or not they should be requiring these as-built foundation surveys to be done, or if it should be removed from City Code. Staff will bring this item for formal consideration of City Council if the general preference of Council is to remove it from code.
