

Watertown City CouncilJanuary 10th, 2023**Agenda Item: Surplus Fire Department Equipment****Request for Action: Declare Surplus Equipment and Authorizing Sale****Department: Tom Hanson, Fire Chief****Background:**

New Automated External Defibrillators have been received and put into service by Fire Department Staff. The units that these replaced are no longer needed. These units are serviceable but will require updated batteries to make them fully operational again. It is our intention to sell these units "as-is" with no additional maintenance cost to the City of Watertown. It is my recommendation that the City sells and directs any revenue generated from the sale of the following units to the Fire Capital Fund.

- Cardiac Science AEDs (5)
- Philips AED (1)
